

Call Front, Finish Right, Forward

- Start with food in both hands.
- Dog should be moving forward with you on a slack leash in Heel position.
- Put yourself in reverse, moving backwards quickly while calling dog and presenting BOTH hands at the dog's nose level.
- Dog should turn to come to you and you should have the food at the dog's nose as quickly as possible when the dog turns back toward you. To do this you will need to reach your arms forward towards the dog.
- While the dog is sniffing at your hands with the food, draw both hands towards your knees (with the dog closely following). Keep moving backwards, drawing the dog with you in a straight line.
- As the dog approaches your knees, come to a stop, luring the dog into a Sit in front of you by lifting both hands towards your tummy.
- When your dog has completed the Sit, lure the dog to your right side by moving your right hand back behind your body with the dog closely following the lure. When the dog is behind you, transfer the leash to your left hand and, using the food in your left hand, lure the dog to your left side.
- As your dog comes around to your left side, begin moving forward. The leash will be in your left hand.
- After a step or two, transfer the leash back to your right hand as you continue forward.

Lure the dog behind you with your right hand

Transfer the leash to your left hand

Forward – the leash will be in your left hand.
